

Final Statistics Report 2022

Summer Reading has wrapped up in the Palliser library region, and it had a massive impact on Saskatchewan residents! Each library branch hosted their own programs, and tailored their approach to the patrons in their communities. Some branches hosted weekly events, some hosted a handful of events throughout the summer, and others provided a purely online program throughout the summer months.

In an attempt to showcase the immense impact that our summer reading programs have on literacy in the region, we asked each branch to record the total minutes that their patrons read over the summer months as a result of their programs. Due to the diversity of programming, we offered two methods of recording: paper reading logs and the Reader Zone app.

Reader Zone is an app for computer and mobile that allows readers to record their reading on the go. With this app, it removes the need for the patron to bring in a physical record throughout the summer, as staff can track reader progress remotely. This is our third year using Reader Zone as a region, and each year enthusiasm for the app increases. This year, we had so many participants using the app that we maxed out our subscription in early July and had to purchase more!

In addition to recording reading, Palliser headquarters also provided branches with optional materials for their programs. These materials included promotional materials (posters, social media images, flyers for schools), activity printables, literacy activity calendars, a printable take-home program for teens, and reading challenge bookmarks. We also hosted video calls with branches to allow for collaboration and sharing of ideas.

According to our recent survey, a majority of branch staff enjoyed the materials Palliser headquarters provided, and the communication and training they received. They also shared some excellent ideas which we hope to implement in the future!
